CONVENIENT FOOD SOLUTIONS

Elbe & Trent

Elbe

Elbe & Trent

The Elbe and the Trent are hot food display cases that provide the ideal display and advertising solution. Designed and manufactured in Europe they have a solid stainless steel construction and are easy to use.

The units come with a removable crumb tray which makes them easy to clean and are fitted with a mechanical thermostat and front light bars.

The Elbe can be accessed from both the back of the display and the front, whilst the Trent is accessed from the rear only. The Trent is more square in its appearance and has an additional shelf, giving it more capacity for displaying food.

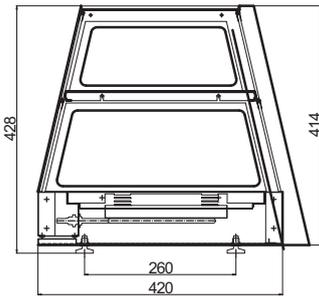

Construction & Technical characteristics

- regulation and set-up of required humidity
- temperature range: +30/+90°C
- standard or self service versions
- voltage 230V/50Hz/1Ph
